## LARXIUS TECHNOLOGIES – COMPLETE CONTENT

---

### **HOME PAGE**

#### **Larxius Technologies**

##### **Secure Your Business Today**

Expert cybersecurity solutions tailored for your needs.

##### **Get Started**

---

#### **Vulnerability Assessment**

Identify and address security weaknesses effectively.

Simulate attacks to strengthen defenses.

Test your web applications for vulnerabilities.

---

#### **Penetration Testing**

Simulate real-world cyberattacks to evaluate how well your systems can withstand threats.

---

#### **Network Scanning**

Assess networks to discover open ports, connected devices, and potential vulnerabilities.

---

#### **About Larxius Technologies**

Your trusted partner in cybersecurity solutions.

A diverse team of cybersecurity professionals collaborating on technology solutions.

**23+ Trusted by industry leaders**

**15 Client Satisfaction**

**Learn More**

---

#### **Cybersecurity Services**

Protect your business with our comprehensive cybersecurity solutions tailored to your needs.

---

## **Vulnerability Assessment**

Identify and address security weaknesses in your systems to enhance protection against threats.

---

## **Penetration Testing**

Simulate cyberattacks to evaluate your defenses and improve your security posture.

Assess the security of your web applications to prevent unauthorized access and data breaches.

---

## **Web Application Testing**

Identify application-level vulnerabilities like SQL Injection, XSS, CSRF, authentication failures, and more.

---

## **Network Security Testing**

A team of professionals conducts network security analysis to ensure secure, stable connections.

Wireless network testing ensures that Wi-Fi environments are protected against intrusion and data theft.

---

## SERVICES PAGE

### Larxius Technologies

#### Cybersecurity Solutions

Comprehensive cybersecurity services tailored to safeguard your business from evolving threats.

---

#### Penetration Testing

We simulate real-world cyberattacks, combining automated scans with expert manual techniques to actively test your defenses.

You receive a detailed, actionable report outlining exploited weaknesses and step-by-step remediation guidance.

---

#### Vulnerability Assessment

Our team uses state-of-the-art automated tools to scan your systems and applications for known vulnerabilities.

This ongoing process provides a prioritized report to help your organization address risks before they become threats.

---

#### Web Application Testing

Using standards like **OWASP**, we thoroughly test your web applications for flaws such as:

- SQL Injection
- XSS
- Authentication / Authorization Issues
- Insecure Deserialization
- Logic vulnerabilities

We use both automated and manual testing to uncover platform-specific security gaps.

---

## **Network Scanning**

We map your network infrastructure to discover:

- Connected devices
- Open ports
- Misconfigured services
- Potential attack paths

This helps mitigate attack surfaces across your organization.

---

## **Wireless Network Testing**

We evaluate your wireless infrastructure for:

- Weak encryption
- Rogue access points
- Misconfigurations
- Wireless intrusion vectors

Simulated attacks ensure your Wi-Fi environment stays secure.

---

## **Social Engineering Testing**

Our ethical hackers conduct:

- Controlled phishing campaigns
- Employee awareness assessments
- Pretexting attempts
- Behavioral engineering analysis

This strengthens your human layer of defense.

---

## **Source Code Review**

We perform detailed manual and automated reviews of your application source code to identify:

- Logic flaws
- Input validation issues

- Hidden vulnerabilities
- Hardcoded secrets
- Misconfigurations

We deliver clear findings with practical remediation guidance.

---

## **Red Team Testing**

Our specialized Red Team mimics sophisticated attackers using advanced tactics and evasion techniques to assess:

- People
- Processes
- Technologies

This real-world scenario testing provides a true measure of resilience.

---

## **AI Model & Data Governance Security**

We secure AI systems and datasets by implementing protections against:

- Data poisoning
- Model inversion
- Model theft
- Unauthorized modification
- Training data tampering

Comprehensive governance ensures safe and compliant AI lifecycle management.

---

## **Configuration Review**

We analyze system, network, and application settings to spot misconfigurations. Correct configuration reduces security gaps and limits the risk of breaches.

---

## **Frequently Asked Questions**

### **What is cybersecurity?**

Cybersecurity involves protecting systems, networks, and data from digital attacks and unauthorized access.

## **How does penetration testing work?**

Penetration testing simulates cyberattacks to evaluate the security of systems and identify weaknesses.

## **What services do you offer?**

We offer penetration testing, vulnerability assessments, social engineering testing, network scanning, wireless testing, red team engagements, source code review, and AI governance security.

## **What is a vulnerability assessment?**

A vulnerability assessment identifies and prioritizes security weaknesses to enhance protection.

## **Why is network scanning important?**

Network scanning identifies devices, open ports, and potential vulnerabilities in your infrastructure.

---

## **Cybersecurity Projects**

### **Vulnerability Assessments**

We identify weaknesses to enhance security and protect your business from potential cyber threats.

### **Penetration Testing – Comprehensive Testing**

We simulate attacks to ensure your defenses are robust and effective against real-world threats.

---

## **Connect**

Stay updated with our latest insights.

## **ABOUT PAGE**

### **About Larxius Technologies**

We provide innovative cybersecurity solutions tailored to your business needs, ensuring protection against evolving cyber threats.

---

## **Our Commitment**

Dedicated to delivering high-quality services, we empower businesses to thrive in a secure digital landscape.

---

### **Cybersecurity Projects**

#### **Vulnerability Assessments**

We identify weaknesses in your systems, ensuring robust security measures are implemented.

---

#### **Web Application Testing**

We evaluate online platforms to safeguard against vulnerabilities and improve reliability and user trust.

---

### **Client Testimonial**

“Larxius Technologies transformed our cybersecurity approach, providing invaluable insights and solutions that significantly enhanced our protection against threats.”

**Tarang Vyas**

CEO, Perceptioncare (I) Pvt. Ltd.
